

LEAF

Zero Emission

recyclability

Nissan LEAF loves the planet. That's why it's made with a class-leading amount of recycled materials, and it is more than 95% recyclable.

the new design

The ultra-aerodynamic design of Nissan LEAF actually helps save energy and reduce wind noise.

the new energy

Recharging Nissan LEAF is quick, clean and easy. Choose a long or short charge. At home, at work or even out shopping.

the new safety

The all-electric, no compromise Nissan LEAF isn't just advanced technically. It's just as unique and advanced when it comes to safety.

The 100% electric Nissan LEAF

the new signs

See how responsibly you're driving on the combi meter with tree display. Could you become World Champion?

the new connectivity

You can control the recharging and the air con from your mobile phone*, and plan your journey from the web.

the new drive

Better responsiveness than a conventional compact family car, 90mph top speed and it recharges every time you brake. Ready to put your foot down in Nissan LEAF?

the new safety

Nissan LEAF is just as safe as a standard family saloon. There's no fuel risk. And it has six airbags, ABS and ESP.

the new interface

Every element of Nissan LEAF, from the steering wheel to the clever palm gear shift, has been designed specifically for Nissan LEAF.

The 100% electric Nissan LEAF

* Available with selected mobile phones.
Left hand drive model shown for illustrative purposes only.

recyclability

An important part of the Nissan LEAF is made from recycled elements – including the roof rim, door trim, seats and flooring. Even the bumpers are made from a unique Nissan recycling process.

the real car

Nissan LEAF has its batteries stored below your feet, so you get lots of useful boot space.

the new air

No tailpipe, no emissions. The all-electric Nissan LEAF doesn't produce one gram of CO₂ whilst driving.

technical

- Front motor with front wheel drive
- Over 140 kmph (90 mph) top speed
- Laminated lithium-ion battery type
- High response synchronous AC motor with 80kW power output, 280Nm torque
- 24kWh Battery capacity
- 100 mile cruising range (US LA4 Mode - fresh battery w/o A/C and heater)
- 4445mm length, 1770mm width and 1550mm height
- 2700mm wheelbase
- Co-regenerating and mechanical braking system

exterior

- Front LED head lamps with "follow me home"
- LED Rear lamps
- 16" Alloy wheels
- Front fog lamp
- Privacy glass from 2nd row
- Electric folding outside mirrors

* Available on selected mobile phones.

The 100% electric Nissan LEAF

LEAF standard equipment

We see SHIFT_ as an invitation. To challenge whatever feels too familiar. To open your mind to the unfamiliar. To ask the questions no-one else is asking. And to find answers no-one else can. At Nissan, we do this every day. And it shapes everything we do. The result is a line-up of vehicles that represents a pure, uncompromising shift from the ordinary.

Every effort has been made to ensure that the content of this publication is correct at the time of going to press (August 2010). This brochure has been produced featuring prototype vehicles exhibited at motor shows. In accordance with the company's policy of continuously improving its products, Nissan International reserves the right to change at any time the specifications and the vehicles described and shown in this publication. Nissan dealers will be informed of any such modifications as quickly as possible. For questions and queries regarding LEAF please call our electric vehicle phone line on 0800 027 0075. Because of the limitations of the printing processes used, the colours shown in this brochure may differ slightly from the actual colours of the paint and interior trim materials used. All rights reserved. Reproduction in whole or part of this brochure without the written permission of Nissan International is forbidden. Where used, Zero Emission relates to CO2 emissions of LEAF whilst being driven.
